Dear Mr Goodin,

I have been caring for Police K9 Boy since September 2, 2011, when he was purchased by the department. At that time he was 3 years old. On September 14, 2016 I examined K9 Boy, and he had arthritis in his lower spine and hips. His prostate was swollen also. He was given anti-inflammatory medicine and got better, but has had recurrent bouts of soreness and arthritis since then that have decreased his mobility and have caused Sgt. Sawyer to recommend that K9 Boy be retired. I concur with that recommendation.

Sincerely,

Arthur C. Seale DVM
