March 15, 2013 - Repair of Water Main at Hearne and Milam to Affect Traffic

*Interruption Expected to Last 10-12 Hours*

The Department of Water and Sewerage is currently repairing a twenty-inch water main blowout at the intersection of Hearne Avenue and Milam Street. This will affect both inside lanes and half of the intersection. It will take approximately 10 to 12 hours to repair the water main. Repairs will then begin on the street.

Residents and business directly affected by the water main repair may notice a decrease in their water pressure.
