Shreveport Police Dept.

FOR IMMEDIATE RELEASE

Crime scene evidence leads to arrest

Suspect Jekeldrick Alexander

Evidence recovered at the scene of a residential burglary leads to the arrest of an alleged suspect.

Shreveport Police investigators have arrested a man, who based on fingerprint evidence, is believed to be responsible for the burglary of a west Shreveport home back in July. On July 26, 2018, Shreveport Police patrol officers were dispatched to a home in the 3000, block of Oak Forest relative to a burglary alarm. Officers arrived to observe the front door of the home slightly open and an interior window busted out. There were no suspects apprehended at the scene.

Efforts by responding officers to lift latent fingerprint evidence proved valuable, as members of the Shreveport Police Department's Crime Scene Unit were able to match the prints to 17 year old Jekeldrick Alexander. After matching the prints, the search began for Alexander, who was found to be currently incarcerated on charges unrelated to the burglary. Alexander now faces charges of Simple Burglary of an inhabited dwelling.
