PRESS RELEASE

September 12, 2013

City Conducting Sewer Assessment in Cedar Grove

The City of Shreveport is beginning a Sanitary Sewer Assessment (SSA) in various locations throughout the Cedar Grove Sub-Basin. Experts will inspect manholes, conduct smoke tests, clean and inspect closed circuit television operations.

This area is approximately bounded to the north by I-20, east by I-49, south and west by LA 3132. This work is being performed by Compliance EnviroSystems, LLC (CES), and will be administered and supervised by Burk-Kleinpeter, Inc. (BKI).

The public will see extensive smoke testing coming from the vent stacks on houses and from the ground. The odorless smoke is nontoxic, non-staining, white to gray in color, and creates no fire hazard. A Material Safety Data Sheet (MSDS) is available upon request.

CES field personnel will access the sewer system at sewer manholes throughout the project. They will operate from City streets and may temporarily inconvenience traffic. There will be no need for field personnel to enter houses or businesses. All field personnel will be in uniform and carry visible identification badges issued by the City. All CES vehicles will be clearly identified.

This work will generally be conducted weekdays from 7 a.m. – 6 p.m. through the next 12 months. In special cases some work may be done at night. The list of affected streets will be updated weekly and posted online at www.shreveportla.gov.

Questions may be referred to BKI at 318-222-5901, CES at 225-769-2933, or the City's Department of Engineering and Environmental Services at 318-673-6000.
