Certification

Actuarial computations presented in this report under Statements No. 67 and 68 of the Governmental Accounting Standards Board are for purposes of assisting the City in fulfilling its financial accounting requirements. No attempt is being made to offer any accounting opinion or advice. This report is for fiscal year January 1, 2019 to December 31, 2019. The reporting date for determining plan assets and obligations is December 31, 2019. The calculations enclosed in this report have been made on a basis consistent with our understanding of the plan provisions. Determinations for purposes other than meeting financial reporting requirements may be significantly different than the results contained in this report. Accordingly, additional determinations may be needed for other purposes, such as judging benefit security or meeting employer

In preparing this report, we relied, without audit, on information as of January 1, 2020 and December 31, 2019 furnished by the City. This information includes, but is not limited to, statutory provisions, member census data, and financial information. The membership as of January 1, 2020 includes 10 active participants and 334 retirees and beneficiaries.

We performed a limited review of the census and financial information used directly in our analysis and have found them to be reasonably consistent and comparable with information used for other purposes. The valuation results depend on the integrity of this information. If any of this information is inaccurate or incomplete our results may be different and our calculations may need to be revised.

We hereby certify that, to the best of our knowledge, this report, including all costs and liabilities based on actuarial assumptions and methods, is complete and accurate and determined in conformance with generally recognized and accepted actuarial principles and practices, which are consistent with the Actuarial Standards of Practice promulgated by the Actuarial Standards Board and the applicable Guides to Professional Conduct, amplifying Opinions and supporting Recommendations of the American Academy of Actuaries.

This valuation report is only an estimate of the Plan's financial condition as of a single date. It can neither predict the Plan's future condition nor guarantee future financial soundness. Actuarial valuations do not affect the ultimate cost of Plan benefits, only the timing of Plan contributions. While the valuation is based on an array of individually reasonable assumptions, other assumption sets may also be reasonable and valuation results based on those assumptions would be different. No one set of assumptions is uniquely correct. Determining results using alternative assumptions is outside the scope of our engagement.

Future actuarial measurements may differ significantly from the current measurements presented in this report due to factors such as, but not limited to, the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period or additional cost or contribution requirements based on the plan's funded status); and changes in plan provisions or applicable law. Due to the limited scope of the actuarial assignment, we did not perform an analysis of the potential range of such future measurements.

Certification

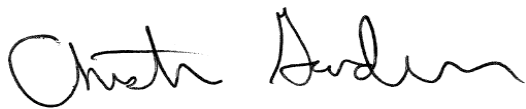

Milliman's work is prepared solely for the internal use and benefit of the City of Shreveport. To the extent that Milliman's work is not subject to disclosure under applicable public records laws, Milliman's work may not be provided to third parties without Milliman's prior written consent. Milliman does not intend to benefit or create a legal duty to any third party recipient of its work product. Milliman's consent to release its work product to any third party may be conditioned on the third party signing a Release, subject to the following exceptions: (a) the Plan Sponsor may provide a copy of Milliman's work, in its entirety, to the Plan Sponsor's professional service advisors who are subject to a duty of confidentiality and who agree to not use Milliman's work for any purpose other than to benefit the Fund; and (b) the Plan Sponsor may provide a copy of Milliman's work, in its entirety, to other governmental entities, as required by law.

No third party recipient of Milliman's work product should rely upon Milliman's work product. Such recipients should engage qualified professionals for advice appropriate to their specific needs.

The consultants who worked on this assignment are pension actuaries. Milliman's advice is not intended to be a substitute for qualified legal or accounting counsel.

The signing actuaries are independent of the plan sponsor. We are not aware of any relationship that would impair the objectivity of our work.

On the basis of the foregoing, we hereby certify that, to the best of our knowledge and belief, this report is complete and has been prepared in accordance with generally recognized accepted actuarial principles and practices. We are members of the American Academy of Actuaries and meet the Qualification Standards to render the actuarial opinion contained herein.

Consulting Actuary

Overview of GASB 67 and GASB 68

The Governmental Accounting Standards Board (GASB) released new accounting standards for public pension plans and participating employers in 2012. These standards, GASB Statements No. 67 and 68, have substantially revised the accounting requirements previously mandated under GASB Statements No. 25 and 27. The most notable change is the distinct separation of funding from financial reporting. The Annual Required Contribution (ARC) has been eliminated under GASB 67 and 68 and is no longer relevant for financial reporting purposes. As a result, plan sponsors have been encouraged to establish a formal funding policy that is separate from financial reporting calculations.

GASB 67 applies to financial reporting for public pension plans and is required to be implemented for plan fiscal years beginning after June 15, 2013. Note that a plan's fiscal year might not be the same as the employer's fiscal year. Even if the plan does not issue standalone financial statements, but rather is considered a pension trust fund of a government, it is subject to GASB 67. Under GASB 67, enhancements to the financial statement disclosures are required, along with certain required supplementary information.

GASB 68 governs the specifics of accounting for public pension plan obligations for participating employers and is required to be implemented for employer fiscal years beginning after June 15, 2014. GASB 68 requires a liability for pension obligations, known as the Net Pension Liability, to be recognized on the balance sheets of participating employers. Changes in the Net Pension Liability will be immediately recognized as Pension Expense on the income statement or reported as deferred inflows/outflows of resources depending on the nature of the change.

Executive Summary

Relationship Between Valuation Date, Measurement Date, and Reporting Date

The Valuation Date is January 1, 2020. This is the date as of which the actuarial valuation is performed. The Measurement Date is December 31, 2019. This is the date as of which the net pension liability is determined. The Reporting Date is December 31, 2019. This is the plan's and/or employer's fiscal year ending date.

Significant Changes

There have been no significant changes between the valuation date and fiscal year end.

Schedule of Employer Contributions

Fiscal Year Ending December 31	Actuarially Determined Contribution	Actual Employer Contribution	Contribution Deficiency (Excess)	Covered Payroll	Contribution as a % of Covered Payroll
2010	\$2,847,389	\$1,407,204	\$1,440,185	\$2,135,980	65.88%
2011	2,310,932	1,462,207	848,725	1,197,330	122.12%
2012	3,726,529	1,465,203	2,261,326	1,140,314	128.49%
2013	4,477,402	964,526	3,512,876	858,951	112.29%

Net position restricted for pensions

Beginning of year (December 31, 2018)	14,257,890
End of year (December 31, 2019)	14,789,096

Money-Weighted Rate of Return

Fiscal Year Ending December 31	Net Money-Weighted Rate of Return
2010	n/a
2011	n/a
2012	n/a
2013	12.03%
2014	3.72%
2015	-2.54%
2016	5.08%
2017	9.81%
2018	-5.45%
2019	15.23%

Calculation of Money-Weighted Rate of Return

The money-weighted rate of return considers the changing amounts actually invested during a period and weights the amount of pension plan investments by the proportion of time they are available to earn a return during that period. External cash flows are determined on a monthly basis and are assumed to occur at the beginning of each month. External cash inflows are netted with external cash outflows, resulting in a net external cash flow in each month. The money-weighted rate of return is calculated net of investment expenses.

	Net External Cash Flows	Periods Invested	Period Weight	Net External Cash Flows With Interest
Beginning Value - January 1, 2019	\$14,257,890	12.00	1.00	\$16,428,993
Monthly net external cash flows:				
January	(126,454)	12.00	1.00	(145,709)
February	(126,454)	11.00	0.92	(144,066)
March	(126,454)	10.00	0.83	(142,240)
April	(126,454)	9.00	0.75	(140,636)
May	(126,454)	8.00	0.67	(139,051)
June	(126,454)	7.00	0.58	(137,288)
July	(126,454)	6.00	0.50	(135,740)
August	(126,454)	5.00	0.42	(134,210)
September	(126,454)	4.00	0.33	(132,509)
October	(126,454)	3.00	0.25	(131,015)
November	(126,454)	2.00	0.17	(129,537)
December	(126,454)	1.00	0.08	(127,896)
Ending Value - December 31, 2019	14,789,096			14,789,096
Money-Weighted Rate of Return		15.23%		

Long-Term Expected Rate of Return

The best-estimate range for the long-term expected rate of return is determined by adding expected inflation to expected long-term real returns and reflecting expected volatility and correlation. The capital market assumptions are per Milliman's investment consulting practice as of December 31, 2019.

Asset Class	Index	Target Allocation	Long-Term Expected Arithmetic Real Rate of Return	Long-Term Expected Geometric Real Rate of Return

Portfolio Standard Deviation				9.79%
Long-Term Expected Rate of Return (per City of Shreveport)				7.00%

Depletion Date Projection

In order to determine if the plan's fiduciary net position is projected to be sufficient to make projected benefit payments, we have prepared a depletion date projection using the following techniques and assumptions:

- Current active members contribute the required employee contribution amounts.
- The employer contributes the actuarially determined contribution amounts.
- Benefit payments are projected based on the actuarial assumptions and the current plan provisions.
- Members are assumed to receive pay increases, terminate, retire, become disabled, die, and so forth according to the actuarial assumptions used for the January 1, 2020 valuation.
- Terminating and retiring members will not be replaced with new employees.
- Current administrative expenses are assumed to increase by 3.00% per year.
- All cash flows are assumed to occur on average halfway through the year.
- The long-term expected rate of return on pension plan investments is 7.00%.
- The tax-exempt, high-quality general obligation municipal bond index rate is 2.74%.
- The funding policy used to determine actuarially determined contributions does not change. See the last page of this report for details.
- The actuarial assumptions do not change.
- The plan provisions do not change except if any material future changes have been agreed upon as of the measurement date.

Actual results at each point in time will yield different values, reflecting the actual experience of the plan membership and assets.

Projection of Contributions

Year	Projected Payroll Current Employees	Projected Payroll Future Employees	Total Employee Payroll	Contributions from Current Employees	Employer Contributions for Current Employees	Contributions from Future Employees*	Total Contributions
1	\$0	\$0	\$0	\$0	\$1,683,870	\$0	\$1,683,870

Total					26,918,436	0	26,918,436

Note: Years 17-99 have been omitted from this table.

* Discounted at the long-term expected rate of return, 7.00%

** Discounted at the municipal bond rate, 2.74%

*** Discounted at the single interest rate that produces a total actuarial present value equal to the sum of the actuarial present values of "funded" and "unfunded" benefit payments, 7.00%

Net Pension Liability

Net Pension Liability	December 31, 2018	December 31, 2019
Total pension liability	\$27,164,167	\$27,938,153
Fiduciary net position	14,257,890	14,789,096
Net pension liability	12,906,277	13,149,057
Fiduciary net position as a % of total pension liability	52.49%	52.94%
Covered payroll	950,673	998,206
Net pension liability as a % of covered payroll	1357.59%	1317.27%

The total pension liability was determined by an actuarial valuation as of the valuation date, calculated based on the discount rate and actuarial assumptions below, and was then projected forward to the measurement date. Any significant changes during this period have been reflected as prescribed by GASB 67 and 68.

Discount Rate

Discount rate	7.00%	7.00%
Long-term expected rate of return, net of investment expense	7.00%	7.00%
Bond Buyer General Obligation 20-Bond Municipal Bond Index	4.00%	2.74%

The plan's fiduciary net position was projected to be available to make all projected future benefit payments of current active and inactive employees. Therefore, the discount rate for calculating the total pension liability is equal to the long-term expected rate of return.

Other Key Actuarial Assumptions

The plan has not had a formal actuarial experience study performed.

Valuation date	January 1, 2019	January 1, 2020
Measurement date	December 31, 2018	December 31, 2019
Inflation	2.50%	2.50%
Salary increases including inflation	5.00%	5.00%
Mortality	Non-annuitants: RP-2000 "Employees" table projected to 2034 using Scale AA; Annuitants: RP-2000 "Healthy Annuitants" projected to 2026	Pri-2010 Public Safety and MP-2019 Improvement converging to long-term rate of 0.5% in 2035
Actuarial cost method	Entry Age Normal	Entry Age Normal

Changes in Net Pension Liability

Changes in Net Pension Liability	Increase (Decrease)		
	Total Pension Liability	Plan Fiduciary Net Position	Net Pension Liability
	(a)	(b)	(a) - (b)
Balances as of December 31, 2018	\$27,164,167	\$14,257,890	\$12,906,277
Changes for the year:			
Service cost	1,721		1,721
Interest on total pension liability	1,850,228		1,850,228
Effect of plan changes	0		0
Effect of economic/demographic gains or losses	(714,993)		(714,993)
Effect of assumptions changes or inputs	1,130,392		1,130,392
Benefit payments	(1,493,362)	(1,493,362)	0
Employer contributions		0	0
Member contributions		0	0
Net investment income		2,048,648	(2,048,648)
Administrative expenses		(24,080)	24,080
Balances as of December 31, 2019	27,938,153	14,789,096	13,149,057

Sensitivity Analysis

The following presents the net pension liability of the City, calculated using the discount rate of 7.00%, as well as what the City's net pension liability would be if it were calculated using a discount rate that is 1 percentage point lower (6.00%) or 1 percentage point higher (8.00%) than the current rate.

	1% Decrease 6.00%	Current Discount Rate 7.00%	1% Increase 8.00%
Total pension liability	\$31,306,972	\$27,938,153	\$25,115,897
Fiduciary net position	14,789,096	14,789,096	14,789,096
Net pension liability	16,517,876	13,149,057	10,326,801

This schedule is presented to illustrate the requirement to show information for 10 years. However, recalculations of prior years are not required, and if prior years are not reported in accordance with the current GASB standards, they should not be reported.

Pension Expense

Pension Expense	January 1, 2018 to December 31, 2018	January 1, 2019 to December 31, 2019
Service cost	\$1,724	\$1,721
Interest on total pension liability	1,826,801	1,850,228
Effect of plan changes	0	0
Administrative expenses	22,576	24,080
Member contributions	0	0
Expected investment return net of investment expenses	(1,112,280)	(945,840)
Recognition of Deferred Inflows/Outflows of Resources		
Recognition of economic/demographic gains or losses	(239,007)	(714,993)
Recognition of assumption changes or inputs	0	1,130,392
Recognition of investment gains or losses	687,697	467,137
Pension Expense	1,187,511	1,812,725

As of December 31, 2019, the deferred inflows and outflows of resources are as follows:

Deferred Inflows / Outflows of Resources	Deferred Inflows of Resources	Deferred Outflows of Resources
Differences between expected and actual experience	\$0	\$0
Changes of assumptions	0	0
Net difference between projected and actual earnings	(1,058,042)	1,245,213
Contributions made subsequent to measurement date	0	0
Total	(1,058,042)	1,245,213

Amounts currently reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

Year ended December 31:	
2020	\$147,569
2021	86,133
2022	174,029
2023	(220,560)
2024	0
Thereafter*	0

* Note that additional future deferred inflows and outflows of resources may impact these numbers.

Schedule of Deferred Inflows and Outflows of Resources

	Original Amount	Date Established	Original Recognition Period*	Amount Recognized in Pension Expense through 12/31/2019	Balance of Deferred Inflows as of 12/31/2019	Balance of Deferred Outflows as of 12/31/2019
Investment gains or losses	(\$1,102,808)	12/31/2019	5.0	(\$220,562)	(\$882,246)	\$0
	1,972,959	12/31/2018	5.0	394,592	0	1,183,775
	(439,493)	12/31/2017	5.0	(87,899)	(175,796)	0
	307,182	12/31/2016	5.0	61,436	0	61,438
	1,597,842	12/31/2015	5.0	<u>319,570</u>	<u>0</u>	<u>0</u>
		Total		467,137	(1,058,042)	1,245,213
Economic/demographic gains or losses						
	(714,993)	12/31/2019	1.0	<u>(714,993)</u>	<u>0</u>	<u>0</u>
		Total		(714,993)	0	0
Assumption changes or inputs						
	1,130,392	12/31/2019	1.0	<u>1,130,392</u>	<u>0</u>	<u>0</u>
		Total		1,130,392	0	0

* Investment (gains)/losses are recognized in pension expense over a period of five years; economic/demographic (gains)/losses and assumption changes or inputs are recognized over the average remaining service life for all active and inactive members.

Glossary

Actuarially Determined Contribution	A target or recommended contribution to a defined benefit pension plan for the reporting period, determined based on the funding policy and most recent measurement available when the contribution for the reporting period was adopted.
Deferred Inflows/Outflows of Resources	Portion of changes in net pension liability that is not immediately recognized in Pension Expense. These changes include differences between expected and actual experience, changes in assumptions, and differences between expected and actual earnings on plan investments.
Discount Rate	Single rate of return that, when applied to all projected benefit payments, results in an actuarial present value of projected benefit payments equal to the sum of: <ol style="list-style-type: none">1) The actuarial present value of benefit payments projected to be made in future periods where the plan assets are projected to be sufficient to meet benefit payments, calculated using the Long-Term Expected Rate of Return.2) The actuarial present value of projected benefit payments not included in (1), calculated using the Municipal Bond Rate.
Fiduciary Net Position	Equal to market value of assets.
Long-Term Expected Rate of Return	Long-term expected rate of return on pension plan investments expected to be used to finance the payment of benefits, net of investment expenses.
Money-Weighted Rate of Return	The internal rate of return on pension plan investments, net of investment expenses.
Municipal Bond Rate	Yield or index rate for 20-year, tax-exempt general obligation municipal bonds with an average rating of AA/Aa or higher.
Net Pension Liability	Total Pension Liability minus the Plan's Fiduciary Net Position (unfunded accrued liability).
Projected Benefit Payments	All benefits estimated to be payable through the pension plan to current active and inactive employees as a result of their past service and expected future service.
Service Cost	The portion of the actuarial present value of projected benefit payments that is attributed to a valuation year.
Total Pension Liability	The portion of actuarial present value of projected benefit payments that is attributable to past periods of member service using the Entry Age Normal cost method based on the requirements of GASB 67 and 68.
