DATE: February 27, 2021

BOIL WATER ADVISORY HAS BEEN LIFTED

The remaining customers in zip codes **71119** and **71129** of the Shreveport Water System have been cleared from the boil advisory. The samples collected and analyzed from these areas were shown to be absent of any coliform bacteriological contamination. After receiving the analytical results, an official of the Louisiana Department of Health approved the rescission of the voluntary boil water advisory. These customers may now resume the normal use of their water supplied by the City of Shreveport.
