  - Red River Special Flood Hazard Area
  - City Boundary

Note: The Special Flood Hazard Area is based on the recent study done for the purpose of establishing general contours maps for the City of Shreveport. The map depicts or aerial surveys using ground-based reference points that have a range of error of plus or minus 100 feet. This is representative of error of plus or minus 8 feet, without benefit of ground surveys from known reference points. This map is intended only for planning purposes and can not be relied on for certainty.

# City of Shreveport
