CITY OF SHREVEPORT
REQUEST FOR STATEMENT OF QUALIFICATIONS

1.0 PURPOSE

- 1.1 Architectural and Engineering Services Request for Statement of Qualifications, issued by the Shreveport Airport Authority (SAA), hereby seeks a response from interested and qualified applicants in providing Professional Airport Architectural and Engineering (AE) consulting.
- 1.2 The services sought are for a five (5) year term for Professional Airport AE Services, or as approved for the intended duration of the design and construction of the Subject Project. Anticipated additional AE Services are enumerated on the Anticipated Scope of Services List. It is expected that projects may be added and deleted throughout the term of the AE services contract.
- 1.3 The projects may be funded wholly or in part with Airport Improvement Program (AIP) Grants, Bipartisan Infrastructure Law (BIL), Passenger Facility Charges (PFC), Customer Facility Charges (CFC), DOTD Tiger Grants, TSA Transit Security Grants, LA State Capital Outlay Grants, SAA Contributory Funds, and other sources. The Respondent shall assemble a multi-disciplinary team experienced with a variety of projects in a complex airport operations environment. The successful Respondent shall be required to demonstrate the ability and resources necessary to perform the scope of services requested.
- 1.4 This RFS intends to select a team of professionals with specialized technical aviation industry expertise and knowledge for Best Management Practices (BMPs) for construction and airport regulations. Additionally, the AE Firm will plan, design and provide construction phase services with coordination between multiple development needs and priorities on a variety of projects.

2.0 OVERVIEW

- 2.1 Shreveport Regional Airport is located in northwest Louisiana and serves the ArkLaTex region. The airport serves commercial and general aviation. Commercial service is currently offered by four airlines: American Airlines, Delta Air Lines, United Airlines, and Allegiant Air to nine non-stop destinations including Denver, Atlanta, Dallas, Charlotte, Houston, Destin, Orlando-Sanford, Las Vegas, and Los Angeles with many daily non-stop flights. Total O and D enplanements in 2022 were approximately 559,000.
- 2.2 The airport terminal was constructed in the early 1970's and underwent a renovation in the late 1990's to add a new terminal consisting of ticket counters and baggage claim. The TSA checkpoint is located in the connection corridor to the original building. The addition of the new terminal left the Airport with unused area on the lower level of the concourses which have become a cost burden over time.
- 2.3 Additionally, the FAA employee staffed Airport Traffic Control Tower (ATCT) was constructed in the early 1970's. This is a 24/7, 365 day per year facility. This building has reached the end of its usable life and is a key component in the overall scope of the Terminal Modernization and ATCT Relocation Programs.

3.0 PROJECT DESCRIPTION

- 3.1 Over the past 12 years, the Shreveport Regional Airport (SHV) has been studying the development of a major terminal modernization program and related enabling projects. The current terminal has served the Northwest Louisiana region since it was built in the 1970s and, despite the Shreveport Airport Authority's (SAA) best efforts and upgrades over the years, the building has deteriorated and become inefficient to operate. In addition to the aging facility and infrastructure, an airport's function within the industry has evolved. Accommodating TSA operations, evolving to meet current passenger experience demands, and growing ancillary revenue from concessions to maintain a self-sustaining business model, are just some of the industry changes that the current building was never designed to accommodate. Considerations for inadequately sized hold rooms, urgency for better O&M costs, environmental efficiency upgrades and growth in the international air carrier market are key components of the proposed terminal projects. Finally, the outdated terminal configuration with the airport traffic control tower located adjacent of the terminal does not provide any flexibility to modify or expand the terminal's footprint.
