FOR IMMEDIATE RELEASE

August 27, 2025

**CITY OF SHREVEPORT MOVES FORWARD WITH
SOUTHEAST SHREVEPORT POLICE SUBSTATION**

The City of Shreveport has received bids for construction of the third new Shreveport Police Department substation, with Testament Construction submitting the lowest bid at \$1,794,000.

The Cedar Grove Substation will be located in Cedar Grove Park at the corner of West 70th Street and St. Vincent Avenue, adjacent to Interstate 49. Once complete, it will serve Southeast Shreveport and surrounding neighborhoods.

This facility will be the third and final substation authorized by voters in the 2021 Public Safety Bond issue. Under Mayor Arceneaux's administration, progress has accelerated:

- The Monkhouse Drive substation, near Shreveport Regional Airport, opened last month.
- The North Market Street substation is currently under construction and expected to open by next spring.
- The Cedar Grove substation is projected to open by late next summer.

"These substations reflect our commitment to stronger community policing and improved response times," said Mayor Arceneaux. "I want to thank the Perkins administration for initiating this project through the 2021 bond issue, and I am grateful to the citizens of Shreveport who supported it. Our administration is proud to carry this work forward and deliver on this important investment in public safety."
