Shreveport Sanitary Sewer Assessment (SSA)
PHASE 2– SSA Queensboro, Westside, North Highlands, and
Choctaw Bayou Sub-Basins
Project Starts November 2014 - February 2016

The City of Shreveport (City) is beginning a Sanitary Sewer Assessment (SSA) in various locations throughout the Queensboro, Westside, North Highlands, and Choctaw Bayou Sub-Basins. See project area map below. This may affect your property due to trucks and equipment having to be put either on or adjacent to your property. Construction work in the SSA will include dye-water testing, and cleaning and CCTV of sewer lines. This work will take place either adjacent to or directly in the roads in your area. Please watch for traffic signs and barricades that may be erected to regulate traffic throughout the project areas. We sincerely apologize for any inconvenience this may cause. As a part of the Consent Decree, this work will be used to identify and assess defects in gravity sewer lines and man-holes in the Queensboro, Westside, North Highlands, Southside, and Choctaw Bayou Sub-Basins. Evaluation of the identified defects will then be used to prioritize the repairs needed throughout the City's sewer system.
