PRESS RELEASE

May 16, 2017

City to begin road work on Phase I of Linwood Reconstruction Project

The City of Shreveport will begin work Thursday on Phase I of the Linwood Avenue Reconstruction Project. This phase of the project is to remove and replace the concrete roadway along Linwood Avenue beginning at Bert Kouns Industrial Loop. There will be several phases of construction during this project.

The work will begin with the northbound lanes. The traffic will be shifted to the southbound lanes with one lane dedicated to northbound traffic and the other lane dedicated to southbound traffic. Upon completion of the northbound lanes, the construction will move to the southbound lanes. Traffic will be directed to the newly constructed northbound lanes with one lane dedicated to southbound traffic and the other lane dedicated to northbound traffic.

Motorists are strongly urged to plan ahead for possible congestion along the construction route and to pay close attention to traffic control signs, cones, and barricades.

-Shreveport-
